

KPSS-KETO BEARING CARTRIDGE PROGRAM
BEARING CARTRIDGES INTERCHANGEABLE WITH COMPETITOR ASSEMBLIES

From This:

To This:

When a pump goes down and time is of the essence, we can provide you with a new or remanufactured unit in a short period of time – typically dispatched the same day.

The core exchange process is as follows:

1. Call our factory or distributor and have the bearing assembly size ready to tell us.
2. We'll check our inventory and provide you an estimated arrival date of a new/remanufactured unit with detailed pricing.
3. An order for **80% of the 'new' bearing cartridge price** will be placed and the service exchange bearing housing will be dispatched ASAP. This is the **MAXIMUM** amount you will be charged for service exchange.
4. We'll provide freight instructions so you can ship the damaged unit back to our shop.
5. Upon receipt of the damaged unit, we'll perform a written repair cost analysis within 7 days of receipt of cartridge. If the overhaul requires only typical parts (refer following list), you will be credited so that your bill is reduces to roughly **40% of the 'new' bearing cartridge price.**
6. The returned cartridge will then go into our pool of remanufactured units, awaiting the next emergency call.

If a competitor bearing cartridge is returned with the '-10' labyrinth seals (old style with piston rings and lip seals) we will upgrade it to the modern PRP-Keto bearing seal design. Even then, you will not pay more than 80% of the new bearing cartridge price and the reliability of the service exchange fleet is assured.

Typical Service Exchange includes:

1. Complete Strip Down.
2. Bead Blast/Clean.
3. New Bearings.
4. New O Rings.
5. New Shims.
6. New Fasteners
7. Reassemble.
8. Run Test.
9. Heavy Duty Coating.
10. Service Tag ID.
11. Certificate.
12. Laminated BOM sheets and SA Drawings.
13. Electronic (PDF) IOM Manuals.
14. Refer Keto Section 3 for a list of all individual parts prices that will be used when quoting overhauls in excess of the 'Typical Service Exchange' – NO nasty surprises!
15. Freight to and from site is by others.

KPSS-KETO SERVICE EXCHANGE BEARING CARTRIDGES OFFER

- LESS RISK IN CRITICAL ROTATING COMPONENT OF PUMP DUE TO OPTIMAL ASSEMBLY UNDER IDEAL WORKSHOP CONDITIONS
- LESS WASTE AND ENVIRONMENTAL DAMAGE AS PARTS ARE USED WHERE THEY STILL COMPLY WITH AS NEW TOLERANCES
